I have a moto g5s plus (Model:XT1804) and for some weird reason , VoLTE is straight up refusing to work on any android 10 ROM. I did do the efs and persist backup , and it works fine on all pie ROMs.. (RR , LoS , PX , havoc). So does anyone have any idea what is happening?? If so is there any solution /fix? Also the built in screen recorder keeps crashing if I record for more than 5 mins.. I'm currently on havoc OS android 10 with April security patch.. Please help.
